SAMTEK

Driven by Learning. **Focused on Impact.**

Samtek solves tomorrow's challenges today. We design, build, and operate systems that power mission-critical operations. Our expert team combines deep cloud expertise with genuine enthusiasm for cutting-edge technology to deliver solutions that help millions of citizens access critical services every day.

THE SAMTEK DIFFERENCE

Federal Expertise

- Led multi-cloud transformation at CMS by expanding the CMS cloud enclave to include AWS, Google Cloud Platform, and Oracle while migrating or onboarding 200+ applications.
- Navigating the federal government culture with maturity and decades of experience, always putting your mission first.
- Leveraging deep knowledge of applications, technology stacks, and cloud ecosystems.

Technical Leadership

- Providing end-to-end cloud transformation: 325+ applications hosted in 1500+ AWS, GovCloud, and Azure accounts.
- Full lifecycle experience with all cloud platforms.
- Proven results across diverse application architectures and technology stacks.
- Trusted as only prime contractor to manage both major CMS Cloud ecosystems (OIT & CCSQ Cloud).

Modern Mindset

- Developing user-centric products, operations tools and processes, making your work easier and more efficient.
- Reducing costs, SI-driven automating processes, and optimizing cloud performance through innovation.
- Adapting quickly to solve your unique challenges with our agile and flexible approach to problem solving.

CORE CAPABILITIES

Infrastructure & Platform Solutions

- Cloud migration, assessment, & operations
- DevSecOps
- Network infrastructure
- Software & application development
- Low-code/no-code development & solutions
- Microservice architecture
- Kubernetes/OpenShift platform

Cybersecurity & Security Compliance

- Security risk management
- Security compliance
- Zero Trust

Program Services

- SAFe certified
- Procurement strategies & support
- Customer experience
- Human-centered design
- LEAN methodologies
- Portfolio, program, & delivery management

SI-Enabled Cloud Products & Other Services

- Helix (cloud governance)
- Syntro (intelligent knowledge management)
- Recon (penetration testing)
- Machine learning (ML)
- Data science & analytics

PAST PERFORMANCE

CMS
CENTERS FOR MEDICARE & MEDICAID SERVICES

- Delivering successfully on three prime and eight subcontracts in the federal space.
- Building cutting-edge SI applications to bridge capability gaps and reduce service time.
- Leading the Citizen Development movement at CMS, democratizing application development for business owners using Low Code/No Code solutions including Microsoft Power Platform.
- Leading the migration of legacy applications to the cloud while spearheading expansion into a multi-cloud ecosystem.
